

HIPPO WASTE SYSTEMS

HIPPO WASTE SYSTEMS is a Houston-based company dedicated to providing high quality non-hazardous solid waste services at low costs to its customers. Whether you need a full recycling program for your non-hazardous wastes and recyclable materials (including scrap metals and non-ferrous), transportation services or technical assistance for your custom-built environmental equipment, HIPPO WASTE will respond with a professional and personalized customer service.

842 BUSCHONG
HOUSTON, TEXAS 77039

WASTE REMOVAL

HIPPO WASTE has a full range of containers (20, 30 and 40 cubic yards) that will fit your waste management needs. Equipment will be delivered and picked-up in a timely manner and very professional way.

SCRAP METALS

Through their activity, many companies in the greater Houston not only generate Municipal Solid Waste, but also ferrous and non-ferrous scrap metal materials. HIPPO WASTE can help you set up a full recycling program, which will handle both. In many instances, the potential revenues from scrap metal materials will reduce the cost of your regular waste removal.

CLEAN-UPS

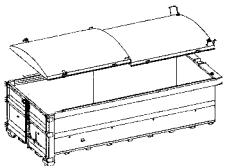

You have a special project; you want to clean up your facility or backyard? HIPPO WASTE can help you, and will supply equipment and transportation for the duration of your project.

TRANSPORTATION NEEDS

Whether you own containers but don't have a truck available, or you need a full Roll-Off transportation service (we will provide containers and transportation) HIPPO WASTE will be happy to help you. Whatever your needs are, our team will arrange transportation for you.

CUSTOM-BUILT EQUIPMENT

If all you need from us is equipment, HIPPO WASTE will be happy to assist you and work with you from A to Z. We can help you design the equipment that will fit YOUR needs and have it custom-built for you at a competitive price.
